

**CBT-F3-A SERİSİ DİŞLİ POMPA / CBD1 - F2 - CC SERIES GEAR PUMP****UYGULAMA VE ÖZELLİKLER / APPLICATION AND FEATURES**

CBT - F3 - A serisi dişli pompa hidrolik sistemlerin dinamik elemanıdır. Pompada 3 tabaka yapı vardır ve otomatik yerini doldurma aksenal temizlik sağlar. DU rulman ve güçlü dökme demir ile donatılmıştır. Basit yapılı, güvenilir iş ve uzun servis süresi karakteristiğine sahiptir. Genel olarak mühendislik hidrolik makinalarında, taşıma makinalarında kullanılır.

CBT - F3 - A series pump is the dynamic component of the hydraulic system. The pump is three sheet type structure and adopts axial clearance automatic compensation device. It is equipped with DU bearing and strength cast iron cover. It has characteristic of simple structure, reliable work and long service life, etc. It is widely used in the hydraulic system of engineering machinery hoist and transport machinery and agriculture machinery.
